Cash	0.7%	0.0%	0.0%	\$1,487	0.7%	0%-10%
Opportunistic	0.1%	0.0%	0.0%	\$300	0.1%	0%-10%

**Actual Allocation vs. Targets**

as of June 30, 2017

Note: Allocation is based on market value of assets at end of period. Values include discretionary cash held by managers. Asset Allocation percentages based off of Total Managed Assets.

(1) As the actual allocation to Private Investments cannot be controlled in the near-term, Adjusted Policy Targets are included, which represent the actual average capital base (ACB) of Private Investments with any over- or under-weight to the 10% target offset by a corresponding and opposite under- or over-weight to the public equity categories on a pro rata basis, based on the Long-Term Target Allocation. ACB is calculated using the NAV at the beginning of the month, adjusted for any cash flows during month.

(2) The Policy Variance reflects the difference between Actual Allocation and the Adjusted Policy Targets
